

## Software Engineer - Informa | Financial Intelligence, Cambridge MA

There has never been a more exciting time to join Informa. The company is executing a multi-million dollar growth acceleration plan and is looking for a talented **Software Engineer** to participate in the design of and implementation of the software that powers EPFR's products.

EPFR Global, in **Informa Financial Intelligence**, is looking for a Software Engineer who will be responsible for implementing new and making changes to existing applications. He or she should be very familiar and comfortable with best practices such as source control, code reviews and unit testing.

The ideal candidate would have excellent knowledge of core web technologies (HTML 5, JavaScript and CSS) and Microsoft-stack technologies (C#, ASP.NET MVC, Razor, Linq, Entity Framework, SQL Server, Azure).

The candidate must be comfortable with team work, collaboration and working with the guidance of other engineers. This role requires interacting with our Quantitative Analysts, as the engineer will be translating financial models into code. Good communication skills and an open, friendly, curious attitude are required.

### JOB DESCRIPTION

- Participate in the design, implementation and maintenance of ASP.NET MVC web applications.
- Collaborate with and take direction from our senior engineers and quantitative analysts.
- Be a consistent advocate for good engineering practices and be willing to write and maintain documentation in our engineering knowledgebase.

### KEY REQUIREMENTS

- Excellent knowledge of the core web technologies: HTML 5, CSS 3 and JavaScript.
- An excellent command of C#, ASP.NET MVC, Razor, Linq, Entity Framework.
- Some familiarity with SQL and relational database theory.
- Must be able to write clean, professional code and be familiar with the best practices that make working with large codebases reasonable.
- An understanding of software development lifecycles is important.

### QUALIFICATIONS

- Working knowledge of JIRA, Confluence, Git, GitFlow and GitHub.
- Experience with SQL Server and Microsoft Azure would be a major plus.

To apply for this opportunity, please submit your resume, cover letter, and salary expectations. [APPLY HERE](#)
