

Datamonitor Healthcare Consulting, part of the Informa Group, is looking for **temporary researchers** to assist with an international pharmaceutical project. In this short-term assignment, you will be performing country-specific research and sourcing relevant information on their pharmaceutical sectors, healthcare education and medical practises. You will primarily be focussed on internet-based research and will be required to report back on your findings to the project team leader.

Key requirements:

- Fluency in one of these languages: **Arabic, Berber, Spanish, Mandarin, Japanese, Indonesian, Malay, Turkish, Persian, Portuguese, Bulgarian, Czech, Polish, Romani or Russian**
- Relevant secondary research experience using online sources
- A relevant qualification in a Life Sciences subjects, or experience in pharmaceutical or healthcare research

This role will be based in our Central London offices, and will be for 1-3 weeks, depending on requirements. To apply, please submit your CV to ibirecruitment@informa.com, quoting reference TR/DM.
